

DRIVEN BY MOTION

Active Power is a global technology company driven by motion, innovation, and a fierce determination to satisfy customer needs. Our products are based on flywheel technology that provide an unique combination of reliability, total cost of ownership, and power density.

Active Power's expert system engineers and worldwide service and support teams ensure that enterprises around the globe have the power to perform. Founded in 1992, Active Power protects operations in more than 50 countries with clean, flywheel-based UPS systems and modular power solutions. Our products and solutions are built in Austin, Texas, at our ISO 9001:2008 registered manufacturing center. Active Power is a division of Piller Power Systems Inc and part of the Piller Group headquartered in Germany.

Active Power CleanSource Flywheel

WHY ACTIVE POWER

40%
 TCO Savings

- Permanent energy storage
- 98% energy efficient
- Less expensive to install and commission

12x
 Less Likely to Fail

- Most reliable energy storage system
- Minimize risk and disruption from maintenance and replacement

9x
 Less Carbon Emissions

- 90% less carbon used in UPS manufacture
- Over 40% less carbon emitted over 15 years

INDUSTRY EXPERTISE

Data Center

Healthcare

Industrial & Manufacturing

SOLUTIONS

CLEANSOURCE[®] XT UPS

Delivers highly efficient and reliable backup power in a compact footprint.

- 250 kW single systems
- Parallelable for multi-megawatt solutions

CLEANSOURCE[®] HD UPS

Delivers 40% TCO savings, is 12x less likely, and reduces carbon emissions by 90%

- 675 kW single system, parallelable up to 4.725 MW

CLEANSOURCE[®] DC

Supplements or replaces battery strings in UPS systems, driving down lifecycle cost while improving reliability

- 250 kW - 2,000 kW

POWERHOUSE[™]

- Complete power systems
- 240kW - 960kW systems
- Full system monitoring
- GenSTART[™] generator starting module

SERVICES

- Design Engineering
- Project management an implementation
- Complete lifecycle management and care
