

# UPS Solutions for Health Care

525+ Units Installed • 185+ Customers • 14+ Countries

Selected by industry leaders around the world

Active Power's CleanSource® UPS, PowerHouse®, and modular IT systems have a proven record of solving the most important health care power problems. Our health care customers use our UPS and modular power solutions to support their IT infrastructure and imaging equipment around the world, helping ensure patient safety and quality.

Total Cost of Ownership	Reliability	Sustainability
 <p><b>40%</b> TCO Savings</p> <ul style="list-style-type: none"> <li>• Permanent energy storage</li> <li>• 98% energy efficient</li> <li>• Less expensive to install and commission</li> </ul>	 <p><b>12x</b> Less Likely to Fail</p> <ul style="list-style-type: none"> <li>• Superior power quality protection for unique health care loads</li> <li>• Minimize risk and disruption from maintenance and replacement</li> </ul>	 <p><b>9x</b> Less Carbon Emissions</p> <ul style="list-style-type: none"> <li>• 90% less carbon used in UPS manufacture</li> <li>• Over 40% less carbon emitted over 15 years</li> </ul>

# Customer Case Studies

**Customer:** Parkland Health & Hospital | Dallas, Texas  
**Need:** Backup power for data center and imaging center  
**Solution:** Seven Active Power CleanSource UPS Systems  
**Key Drivers:** Sustainable, efficient, reliable

***“Active Power’s UPS technology enables us to deploy a forward thinking power infrastructure design with a low carbon footprint and higher energy efficiencies versus traditional systems.”***

– Lou Saksen, SVP, Facilities Planning and Development

**Customer:** UMC Utrecht | Netherlands  
**Need:** Reliable critical backup power solution  
**Solution:** Active Power CleanSource UPS system  
**Key Drivers:** Reliability

***“We needed a trustworthy backup power system to protect the hospital from electrical interruption and the main reason we selected Active Power was the reliability of their UPS products.”***

– Perry van de Graaf, Energy Cluster Manager

## Our Products

### CleanSource® XT250 UPS

250 kW - 1.75 MW

- Delivers highly efficient and reliable backup power in a compact footprint
- Parallelable for multi-megawatt solutions
- Extended ride-through time

### CleanSource MMS UPS

250 kW - 7 MW

- Delivers highly efficient and reliable backup power in a compact footprint
- Parallelable for multi-megawatt solutions

### CleanSource HD675 UPS

675 kW - 4.725 MW

- Delivers 40% TCO savings, is 12x less likely, and reduces carbon emissions by 90%

### CleanSource DC

250 kW - 2 MW

- Supplements or replaces battery strings in UPS systems, driving down lifecycle cost while improving reliability

### PowerHouse®

#### Complete Modular Power Systems

- Factory built and tested for low cost, rapid deployment
- Superior management capability

### Services

- Design engineering and project management
